ALPHACHAIN'S IBP SERVICE OFFERINGS

- Detailed SYSTEM DEMOS for your selected processes to get a closer look at the latest SAP IBP offerings
- PROOF OF CONCEPT workshops using SAP IBP for Response and Supply with a rapid prototyping approach to showcase customer specific scenarios. In these workshops you can realistically foresee your company's key business processes in this new software and alphachain Consulting will support you in building an implementation roadmap
- Fast and smooth implementation through leveraging the SAP RAPID DEPLOYMENT CONTENT with a head start through prototype transfer
- SOLUTION EXPERTS and PROJECT MANAGEMENT for your project through every phase: from developing your own IT solution to implementation, data migration, training, cutover, go-live and support

SAP IBP FOR RESPONSE AND SUPPLY FEATURES

- MULTILEVEL PLANNING: cross locations and multi-level Bill of Materials planning
- SUPPLY PLANNING: heuristic based or optimisation based techniques (constrained / unconstrained)
- RESPONSE MANAGEMENT: create order based supply plan with allocations and re-promise orders by priorities
- EXCEPTION MANAGEMENT: identify and address specific SKUs and resources with issues and simulate corrective actions – Gating Factor Analysis
- Plan with PRODUCT ALLOCATIONS and use them as constraints in supply planning. Product allocations can be used as inputs to available-to-promise processes
- ORDER PEGGING: link demand and supply elements in the order data model for root cause analysis and problem resolution
- ORDER INTEGRATION: integrate with an external system using Open API and batch job data transfer
